Tough Tools for Tough Jobs!

**CRANEOFoot**

_Dunnage for the 21st Century_

Finally, dunnage has come out of the dark ages. The new Cranefoot is a super heavy-duty, plastic dunnage which serves as an outrigger pad, which will not rot or splinter and has its own robust handle. The Cranefoot design is engineered to maximise load capacity whilst reducing weight to make it easier to carry and safer to use.

**Available Sizes**

- Cranefoot 400 450 x 390 x 85 mm
- Cranefoot 500 560 x 500 x 85 mm
- Cranefoot 550 610 x 550 x 85 mm

**HYDRAULIC DRILL HOLSTER**

Tough tool holster for safe and easy access.

**CABIN BOX**

The ideal way to keep your gear safe, clean and organised.
**CRANEFOOT BENEFITS**

The Cranefoot is a heavy-duty, plastic dunnage suitable for use in accordance with AS1418 part 5, “Australian Standard for the design loads of mobile cranes” and AS2550 part 5, “Australian Standard for the safe use of mobile cranes.”

Every cranefoot is quality tested, in accordance with AS4040.3 - 1992 methodology, to an applied load of 11 tonnes and is now the product of choice as outrigger pads for elevated work platforms, light cranes, borers and similar equipment throughout the electricity supply and distribution sector.

**CRANEFOOT FEATURES**

- Cost-effective
- SH & E benefits
- Heavy-duty
- Carry handle
- Won’t splinter
- Won’t rot
- Standard sizing
- Bright & distinctly coloured
- Company mould-in graphics

**HYDRAULIC DRILL HOLSTER**

A very tough, very simple and very safe pouch for close-at-hand storage of hydraulic drills. The holster hangs on the rail of the EWP basket, keeping the tool at easy reach for the operator. The elastic retainer is designed for one-handed use, both releasing and retaining the tool.

**MOULD-ON GRAPHICS**

Your company logo can be incorporated into the product using tough, mould-on graphics. Your company logo could be on each product for promotion and security identification. Graphics are indelibly marked onto the product. They will not peel, crack, smudge or fade. They will last as long as the product!

**TUFF-A-BOX & UNDERBODY GEAR**

Drinking water, tools and all your gear stored in containers tough enough for your work and lifestyle.

**CABIN BOX**

The cabin box ensures an ordered storage of EWP tools and ancillaries.

The internal dividers separate software, hardware and fragile items, extending the life of equipment susceptible to decommissioning due to soiling, contaminants and damage.

Dimensions: Height 350mm, Width 1500mm, Depth 350mm
