

POLY GABION BY GOUGH PLASTICS

180m River Crossing

400m River Crossing

Benefits of Poly Gabion

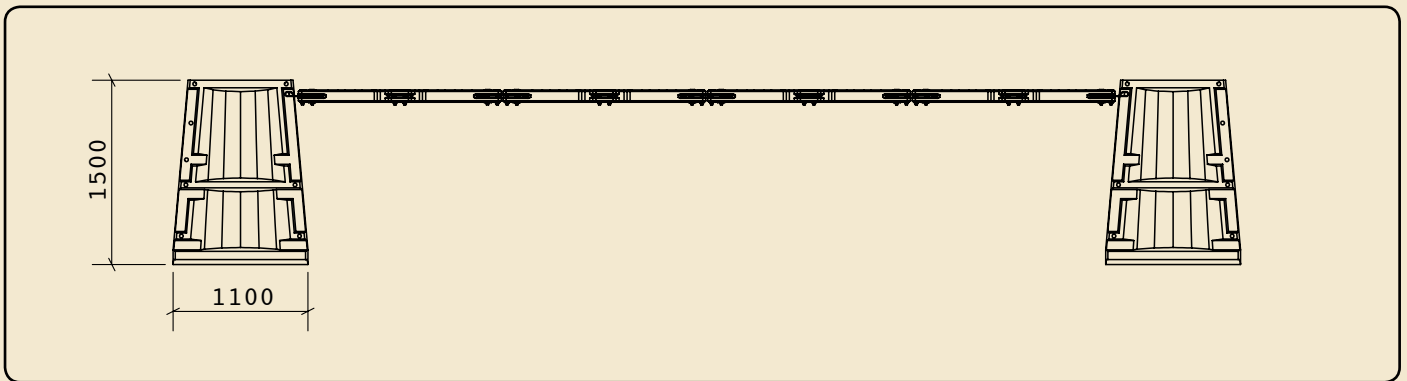

- Speed of installation, e.g. 11 metres per day for a two lane river crossing.
- Decreased labour requirements for men and plant.
- Ability to use local materials to fill the Gabion. No carting of rock over long distances.
- Use in conjunction with TrackPad, concrete culverts, headstocks and other road surfaces.
- Optional use of recycled material.
