

## BioMagic Super 500 & Nu-Klean, great for your Hybrid Toilet System

### Gough Plastics Recommends BioMagic

BioMagic treats the cause instead of the symptom and works in a far superior way to products that mask or absorb odours. BioMagic provides a practical and economical way of supplying oxygen and nutrients in a hydrated form, which allows the facultative bacteria to quickly become and remain aerobic, effectively eliminating sulfide production and actually preventing odours from being produced. It accelerates the rate of waste breakdown. For neutralising biomass, BioMagic acts the same as Mother Nature's bio-cycle, only hyper-accelerated.

pipings and seriously reduce, if not stop, all corrosion in the infrastructure. They allow for longer with-holding times and can be used for remediation of any type of wastewater system.

Available in sizes 5L, 10L, 20L, 200L and 1200L.

### Nu-Klean

BioMagic's Nu-Klean is an effective companion product for all BioMagic treated toilets and any type of biological or natural toilet facility where you do not want to compromise the operation of the unit or the local environment with chemical cleaners. Nu-Klean can be used with or without Super 500 to clean and maintain the bowl or tube and also the surrounds, floors, walls and outside areas of these facilities. It will clean very effectively and economically without affecting the biological processes in the toilet and the used product may be emptied into the unit safely. Site specific information is available on request.

### Super 500

BioMagic's Super 500 is an odour control bio-stimulant that safely eliminates odour associated with organic and human waste products. It is non-hazardous, non-volatile, pH neutral, long lasting and 100% biodegradable and environmentally sustainable.

### Treating Liquid Waste Odours

Start with 50-100ppm in a liquid waste environment and increase or decrease dosage to eliminate odours and quickly digest and process the waste. Simple, effective and environmentally friendly, our solutions oxygenate the setting, feeding naturally occurring bacteria, accelerating natural cycles of waste elimination.

Our bio-stimulants are equally effective in liquid or solid waste conditions and will not only prevent odour but will digest all bio-mat, slime and build-up on

### Using Nu-Klean Multi-purpose Cleaner

Dilute approximately 20:1 for use as a spray cleaner or use 50ml in a bucket of water for the type of cleaning required. Nu-Klean can be used on all washable surfaces with no risk.
